Trio Mobil is Partnering with Audi to Elevate Safety

TRIOMOBIL

In a high-performance environment where AGVs and forklifts work side by side, proactive safety solutions are key to addressing hidden risks.

TRIOMOBIL

Smart Detection Built for Shared Spaces

TRIO SAFE delivers precise AGV detection even in the busiest, high-speed zones - where forklift and AGV traffic is most intense.

TRIOMOBIL

Prevention, Not Just Reaction

At Audi, drivers are instantly alerted if they approach AGVs closer than 2 meters - strengthening compliance without slowing operations.

TRIOMOBIL

Growing Safer Together

Actionable insights and clear reporting help teams grow safer practices – enhancing established safety practices through shared responsibility and awareness.

TRIOMOBIL

The Result?
Safer Logistics Through Smarter Collision Prevention.

“

TRIO SAFE helps make intralogistics even safer. At Audi, the system supports the smooth and safe interaction between forklifts and AGVs in daily operations- contributing to a more efficient production environment while maintaining uninterrupted material flow.
